

# ALL ABOUT CETACEANS

**DID YOU KNOW** that Southern California is one of the best places in the world to spy whales, dolphins and porpoises all year-round?!

From our cliffs and coastlines, you can observe the Pacific gray whale undertake one of the longest migrations of any mammal on planet Earth!

Between the months of October and April, this remarkable whale charts its epic 6,000-mile journey between Alaska and Mexico —and then back again.

Megapods of both common and bottlenose dolphins (sometimes over 2000 individuals) can be seen leaping high out of the water, somersaulting and bowriding alongside ships. Behaviors like spyhopping, breaching, lung feeding and fluking are quite the sight to see by the colossal humpback whale —considered the most acrobatic of all the great whales.

Other cetaceans —including fins, minke, orcas, porpoises and the world’s largest living animal on the planet, the blue whale (measuring over 90 feet, the length of 3 school buses) — can be spotted at different times of the year off our shores, as well as pinnipeds (seals & sea lions), pelagic seabirds and a menagerie of other marine life. This incredibly abundant anthology of wildlife frequents the nutrient-rich waters of the Pacific to feed on schools of fish, krill and squid.

## SO LET THE WHALE-WATCHING ADVENTURE BEGIN!

You have all the tools you need to begin discovering at the touch of your keypad.

Here’s what you’ll need to do to get started. It’s super easy!

Just visit your library’s online digital collection and discover the variety of eResources available to you.

Download library eBooks and eAudiobooks to your laptop, tablet, iPad or any other mobile device.

Browse, checkout and borrow these illustrative books highlighting the 90 species of whales, dolphins and porpoises —known collectively as cetaceans.

From the enormous blue whale to the tiny vaquita dolphin,
