

# DISCOVERY LECTURE SERIES

Presented by Chicken of the Sea and Cabrillo Marine Aquarium

## “BEAUTIFUL MINDS: DOLPHINS, APES *and the* ORIGINS OF HUMAN INTELLIGENCE”

**DR. CRAIG STANFORD**  
**UNIVERSITY OF SOUTHERN CALIFORNIA**

FRIDAY, OCTOBER 5 • 7-9pm  
CABRILLO MARINE AQUARIUM  
JOHN M. OLGUIN AUDITORIUM

Very few people are aware of the striking parallels between apes and dolphins. In both groups we see shrewd politics, murder, sexual violence, sophisticated means of communication, and cultural traditions. Apes and dolphins are only very distantly related – they have not had a common ancestor for almost 100 million years. Dr. Stanford will discuss the convergence of these traits and the extraordinary intelligence they both possess.

Dr. Craig Stanford & friend

Fee: Free, but reservations required (Please RSVP to <https://octoberdiscoverylecture.eventbrite.com>)

Dr. Craig Stanford is an internationally renowned expert on animal behavior and human origins. He is a Professor of Biological Sciences and Anthropology at USC.
