

WATERSHED WALK...

NATURAL BODY
OF WATER

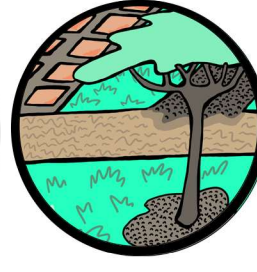

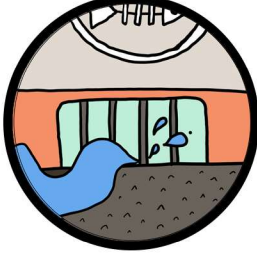

STORM DRAIN
SYSTEM

HUMAN SOURCE
OF WATER

PLANT LIFE

PERMEABLE
GROUND

IMPERMEABLE
GROUND

RIVERS, CREEKS,
LAKES, PONDS,
WETLANDS,
OCEAN...

CATCH BASINS,
STORM DRAINS,
CHANNELS,
OUTFALLS...

GUTTERS, HOSES,
SPRINKLERS, FIRE
HYDRANTS, DRIPS,
RAIN BARRELS...

TREES,
POTTED PLANTS,
GARDEN, WEEDS,
NATIVE PLANTS...

DIRT, SOIL,
SAND, ROCKS,
PEBBLES,
PLANT COVER...

CONCRETE,
ASPHALT,
BUILDINGS,
HOUSES...

TAKE A WALK OUTSIDE AND MAP OUT YOUR PART OF THE WATERSHED.
PAY CLOSE ATTENTION TO WHERE WATER COMES FROM AND WHERE IT CAN GO...

WHAT DO YOU NOTICE AS YOU LOOK AROUND? WHAT WOULD YOU LIKE TO SEE MORE OF IN YOUR WATERSHED... WHAT WOULD YOU LIKE TO SEE LESS OF?

NOTICE ANY LARGE
OR SMALL PATCHES
OF DIRT AROUND?
WHAT ABOUT AN
EMPTY POT OR
CONTAINER?

DRAW WHAT YOU
COULD ADD TO
YOUR WATERSHED
TO MAKE IT
HEALTHIER

WATERSHEDS ARE ABOUT WHERE
WATER FLOWS DOWN THE LAND...
UNFORTUNATELY TRASH, DOG
POOP, OIL, SOAP, FERTILIZER,
PESTICIDES AND MORE END UP
FLOWING DOWN TOO!

WHY IS THIS A PROBLEM?
WHAT CAN YOU DO TO HELP?
